Weather

Seattle is famous for its rain, but visitors are often surprised to find that most of our summer days here in Seattle are warm and sunny! In order to provide you with the best possible experience while staying on our campus, we would like to prepare you for the possibility of summer temperatures reaching 90°F or higher with no in-room cooling. Such periods usually last a week or so at a time, but we cannot be sure which days will be warm or which will be hotter.

Ask us about your options for beating the heat! Our recreational swimming pool is popular during the summer months. Guests may also use their conference cards to access the air-conditioned Student Center.
